I see reports of drinking water back on in Durango?

Maybe some of this info-- once checked, edited by Ostrander and Harrison-- would be more immediately useful for evening update and statement to congs and media and website.

Subject: draft Qs and As

Joan—first shot at Qs and As attached, lots of spots that reflect the limits of my knowledge or best guesses on facts. I am open to all suggestions on how to circulate and get feedback from individuals who can improve this. No matter how we do it will be sloppy.

Whats next?

1. Do want to work this for a bit and get it back to me?
2. Or should Christie shop this to folks in Durango to get feedback and produce an next draft?
3. Or I could send the draft email language below to a handful of people. David Ostrander, Rusty Harris, Deb McKean, Kelly Zito, Craig Myers, Melissa Harrison, and David Gray strike me as good candidates-- but there may be others who you think have a wider sense of facts and status and messaging. (this might be too hard in terms of logistics of getting feedback from so many...)

I'm open to other suggestions as well.

Let me know what will work best!!!!

Rich

.....

Draft Qs and As for use in external communications on GKM attached.

This needs review and input from several people, including individuals in R9, R6, and those most familiar with 1.) the current data and info on risk and WQ and 2. the status of specific response activities and field reports in Durango.

I have tried to send this to people who may be in a position to provide content, updates and check for accuracy. New questions also welcome.

I flagged areas for attention in red.

No easy way to do this quickly. I think the best way to approach this is for you all to offer input with tracked changes to me and I will do my best to marry and process...
